If you want to read a book that is more fairy tale than real life, then this is probably not the book for you. On the other hand, if you want the real story of a woman of our time, who's as controversial a celebrity as they come, and whose life has been filled with glamorous celebrities, sex, drugs, alcohol and claims of child sexual abuse, as well as a hitherto unknown attempted murder – then this is definitely the book for you!

It's the true story of Lady Colin Campbell, the New York and London Times multiple award winning author, socialite, and now TV and stage personality of "I'm a Celebrity...Get Me Out of Here!", "The Lady and The Castle" reality TV show, and the Edinburgh Festival Fringe. And it proves that truth really is stranger than fiction.

Robert Gary Dodds Born in England and with a number of friends who themselves have been close to many in the British Royal family, he married into one of Jamaica's established British colonial families in the 70's. He has had an international career, living and working in Europe, Asia Pacific, the USA, the Middle East & Africa. The author is someone who's highly adept at assessing and reading people, has a quick wit, and is known for telling it as it is. He's done a lot of work with charities and currently sits on The Akilah Institute for Women in Rwanda's Global Advisory Council. He has homes in the United States and England with his wife of 38 years, Mary, and travels extensively in the Americas, Asia, Europe and West Indies.
